

Wowee™ Cleaner Concentrate

Use Instructions

Pour Wowee™ concentrate into the provided spray bottle or other larger containers and add warm water. See below for exact mixture amounts of Wowee™ concentrate to warm water for different uses. To use containers other than the provided spray bottle to clean, fill with warm water and add Wowee™ as seen in the mixture concentration below. Once mixed, just spray whatever needs to be cleaned and wipe it off with a cloth or paper towel.

Before applying to painted surfaces, test for colorfastness.

When using a Stainless Steel Sponge pictured in the commercial, use only on non-scratchable surfaces such as stainless steel pots and pans, broil pans, oven door windows and grill racks.

The amount of Wowee™ concentrate used will be based on what needs to be cleaned. See below for a guide to better assist you with exact amounts of Wowee™ concentrate to warm water.

Household Uses

Mix 1 capful of Wowee™ concentrate and add water to remainder of the spray bottle. This will clean the following:

Walls, doors, baseboards, floors, tile, window frames, blinds, chrome, bathroom sinks, showers and tubs, porcelain, greasy dishes.

Kitchen Uses

Fill the sprayer bottle $\frac{1}{4}$ full of Wowee™ concentrate and add water to the remainder of the spray bottle, or your own dish or container 1 part Wowee™ to 4 parts water. This cleans these more greasy, grimy messes:

Ovens, pans, stove tops, range hoods, exhaust filters, grill racks, kitchen blinds

Laundry Uses

Use 2 capfuls per wash load for oil and grease-stained laundry.

Outdoor Uses

Mix 1 part Wowee™ to 4 parts water to clean the following:

Patio furniture, floors, driveways, patios, play equipment

For oil stains on driveway or garage floor, treat stain with Wowee™ **undiluted** and rinse well.
